Editorial	Springer
ISBN	9788132226901

DESCRIPCIÓN DEL PRODUCTO

Critical care in obstetrics is an upcoming specialty in the developing countries. This book is first of its kind as there are very few books written on this subject with the South East Asian perspective. The book discusses various aspects of critical care in obstetrics starting from the basic principles, physiology, ethics, monitoring and organization of a critical care unit. The various chapters cover management of life threatening illnesses involving various organ systems of the body of a pregnant woman. Furthermore, the management of a pregnant woman is unique as it involves not only management of the patient but the developing fetus in her womb as well. This book aims to help the obstetricians, postgraduate students and critical care providers with the management protocols in dealing with critically ill pregnant women.

- Contains case-based clinical information
- Comprehensive yet easy to consult, updated and written by experts
- A unique and helpful resource for gynecologists and obstetricians

Índice de Principles of Critical Care in Obstetrics Volúmen I 1th edition

1 Epidemiology of Critical Illness in Obstetrics

2 Pregnancy-Induced Alterations in Physiology and Laboratory Reports
3 Ethics in the Setting Up of Obstetric HDU and ICU
4 Organisation and Role of Critical Care Units: Obstetric HDU/ICU
5 Cardiopulmonary Resuscitation in the Pregnant Woman
6 Role of Imaging in Noninvasive Monitoring in Obstetric Intensive Care Unit
7 Basic Hemodynamic and Cardiac Monitoring in Obstetrics
8 Respiratory Monitoring and Blood Gas Physiology
9 Obstetric Monitoring in Critically Ill Pregnant Women
10 Fetal Surveillance in Critically Ill Obstetric Patient
11 Infection Prevention and Control Policy in Obstetric HDU and ICU
12 Transfusion of Blood Components and Derivatives in the Obstetric Patients
13 Fluid and Electrolyte Balance in Critically Ill Obstetric Patient
14 Mechanical Ventilation in Critically Ill Obstetric Patient
15 Nutrition in the Critically Ill Obstetric Patient
16 Post-partum Haemorrhage: Prevention, Medical and Mechanical Methods of Management
17 Conservative and Nonconservative Surgical Management of Postpartum Hemorrhage
18 The Lower Segment of Uterus – A Critical Area in Childbirth and Resulting Trauma
