
Peso	8 kg
Dimensiones	22 × 28 × 7 cm
Encuadernación	Tapa dura
Páginas	2656
Año	2020
Edición	4a edición
Autor	John Harper, Peter Hoeger
Editorial	Wiley-Blackwell
ISBN	9781119142195

DESCRIPCIÓN DEL PRODUCTO

A consummate classic with a fresh approach to pediatric dermatology

Children´s skin is different. Maturation affects the epidermal barrier, the cutaneous microbiome, adnexal structures, vasculature, and transcutaneous absorption of drugs. The immature skin is more susceptible to pathogens and environmental disruption. Many genetic disorders are either present at birth or manifest early in childhood. Skin diseases thus present differently in children than in adults. Pediatric dermatology has seen significant advances over the last decade, particularly in the field of molecular genetics research, which has furthered our understanding of the pathogenesis of many skin diseases and the development of new approaches to treatment.
This fourth edition of the Harper classic provides state-of-the-art information on all aspects of skin disease in children. It covers the diagnosis and treatment of all conditions - both common and rare - with a consistently evidence-based approach. Existing content has been refreshed and fully updated to reflect emerging thinking and to incorporate the latest in research and clinical data - especially at the genetic level.

This new fourth edition includes:

- Greater focus on the genetics behind skin disease, including new genes/genodermatoses, progress in genetic

analysis, and stem cell transplants
- Increased coverage of lasers and other technologies used to treat skin disease
- More summary tables, learning points, tables of differential diagnosis, and clinical algorithms for diagnosis and management
- Additional online features, including patient information links and multiple choice questions

Harper's Textbook of Pediatric Dermatology delivers crucial clinical insights and up-to-date research information that spans the breadth of the field. As the most comprehensive reference book on this subject available, this revised fourth edition will support and guide the daily practice of both dermatologists and pediatricians across the world.

Índice Harper's Textbook of Pediatric Dermatology 4th Edition

Section 1 Development, Structure and Physiology of the Skin
Section 2 Skin Disorders of the Neonate and Young Infant
Section 3 Atopic Dermatitis and Related Disorders
Section 4 Other Types of Dermatitis
Section 5 Psoriasis
Section 6 Other papulosquamous disorders
Section 7 Bacterial skin Infections
Section 8 Fungal skin infections
Section 9 Viral skin infections and opportunistic infections
Section 10 Parasitic skin infestations and sting reactions
Section 11 Urticaria, erythemas and drug reactions
Section 12 Acne and acneiform disorders
Section 13 Nutritional disorders
Section 14 Blistering disorders
Section 15 Photodermatoses, photoprotection and environmental skin disorders
Section 16 Granulomatous diseases
Section 17 Neutrophilic dermatoses
Section 18 Lymphocytic disorders
Section 19 Histiocytic disorders
Section 20 Mastocytosis
Section 21 Disorders of connective tissue
Section 22 Disorders of fat tissue
Section 23 Mosaic disorders, naevi and hamartomas
Section 24 Non-vascular skin tumours
Section 25 Vascular tumours and malformations
Section 26 Disorders of Pigmentation
Section 27 Disorders of Keratin and Keratinization
Section 28 Focal or generalized hypoplasia, premature ageing
Section 29 Genetic diseases predisposing to malignancy
Section 30 Neurofibromatosis, RASopathies, and Hamartoma-overgrowth-syndromes

Section 31 Vasculitic and Rheumatic Syndromes
Section 32 Cutaneous Manifestations of Systemic Disease
Section 33 The oral cavity
Section 34 Hair, scalp and nail disorders
Section 35 Anogenital disease in children
Section 36 Cutaneous Signs of Child Maltreatment and Sexual Abuse
Section 37 Psychological Aspects of Skin Disease in Children
Section 38 Principles of treatment in children
Section 39 Diagnostic procedures in dermatology
Section 40 Nursing care of cutaneous disorders in children
