

Peso	0.968 kg
Dimensiones	21 × 28 × 2 cm
Encuadernación	Tapa dura
Páginas	316
Año	2021
Edición	1era edición
Autor	Jennifer E. Liu, Richard M. Steingart
Editorial	Springer
ISBN	9783030709976
Idioma	Inglés

DESCRIPCIÓN DEL PRODUCTO

This atlas provides a practically applicable didactic case-based guide to the use of cardiac imaging in patient care during and after cancer therapy. It features detailed information on a variety of imaging modalities, including transesophageal echocardiography, magnetic resonance angiography and positron emission tomography. A range of actual patient presentations are included covering both diagnosis and management during curative and palliative surgery, as well as cancer pharmacotherapy with the use of drugs including Trastuzumab, Anthracycline, Cisplatin and Carboplatin. Topics relevant to survivorship are also described.

Atlas of Imaging in Cardio-Oncology enables the reader to develop a deep understanding of how to utilise a variety of imaging modalities used in cardio-oncology in a range of scenarios. It provides a critical and timely resource for the trainee and experienced cardiologist, oncologist and radiologist.

Puntos clave del libro Atlas of Imaging in Cardio-Oncology 1st edition

- Provides a number of real world case-based scenarios to reveal the clinical subtlety of imaging cardio-oncology patients
- Collection of case studies presented by practitioners from around the globe to give readers an international

perspective on the practice of cardio-oncology

- Assists teaching in the area with the use of didactic clinical review questions and answers
- Contains a wealth of informative figures and video material

Índice del libro Atlas of Imaging in Cardio-Oncology 1st edition

- 1 Multimodality Imaging in Cardio-Oncology
- 2 Anthracycline/Trastuzumab Cardiac Toxicity
- 3 Immune Checkpoint Inhibitor (ICI)-Associated Myocarditis
- 4 Cardiovascular Events After Chimeric Antigen Receptor T-Cell Therapy
- 5 Introduction to Tyrosine Kinase Inhibitors: Pazopanib Cardiotoxicity
- 6 Tyrosine Kinase Inhibitors: Arrhythmias and Coagulopathy
- 7 Vascular Toxicity of Tyrosine Kinase Inhibitors: Peripheral Vascular and Coronary Artery Disease
- 8 Vascular Toxicity of Tyrosine Kinase Inhibitors: Coronary Artery Disease
- 9 Vascular Toxicity of Tyrosine Kinase Inhibitors: Pulmonary Hypertension
- 10 Cardiovascular Toxicities of Proteasome Inhibitors
- 11 Cardiac Complications of 5-Fluorouracil (5FU) and Capecitabine Therapy
- 12 Cisplatin and Carboplatin
- 13 Cardiac Risk Assessment Prior to Hematopoietic Stem Cell Transplantation: Cases and Management Strategies
- 14 The Role of Myocardial Perfusion Imaging in Cardiac Clearance of Cancer Patients
- 15 Perioperative Management of the Cancer Patient
- 16 Masses Involving the Heart and Vasculature
- 17 Carcinoid Heart Disease
- 18 Cardiac Amyloidosis
- 19 Stress-Induced Cardiomyopathy
- 20 Arterial Thrombosis and Marantic Endocarditis
- 21 Pericardial Effusion, Tamponade, and Constrictive Pericarditis
- 22 Introduction to the Cardiac Implications of Radiotherapy
- 23 Cardio-Oncologists Perspective on the Cardiac Implications of Radiotherapy: Complex Cases of Radiation-Related Valvular and Vascular Disease
- 24 Radiation-Related Coronary and Conduction System Disease
- 25 Radiation Injury to the Heart, Great Vessels, and Their Branches
- 26 Cardiac Constriction and Restriction After Chest Radiotherapy for Hodgkin's Lymphoma and Breast Cancer
- 27 Onset of Heart Failure After Anthracycline Therapy in the Adult: Treatment and Expectations for Recovery
- 28 Heart Failure in Long-Term Survivors of Childhood or Adolescent Cancers
- 29 Health Care Disparities in Cardio-Oncology

30 Cardio-Oncology Practice in the Community

31 Cardio-Oncology in the COVID-19 Era

32 Acute Cardiac Care of Cancer Patients
