
Peso	1 kg
Dimensiones	22 × 28 cm
Encuadernación	Tapa blanda
Páginas	1368
Año	2023
Edición	5a edición
Autor	David Staskin, Linda Cardozo
Editorial	CRC Press
ISBN	9780367700201
Idioma	Inglés

DESCRIPCIÓN DEL PRODUCTO

Featuring contributions by an international team of the world's experts in urology and gynecology, this fifth edition reinforces its status as the classic comprehensive resource on female urology and urogynecology and an essential clinical reference in the field. There are new chapters throughout and new commentaries on important documents in the appendixes; each volume is now available separately. *Offers a comprehensive guide to both medical and surgical sides *Covers important and common topics such as stress incontinence, pelvic organ prolapse, and robotic surgery and newer topics such as transgender surgery *Presents a practical and manageable level of detail

Índice del libro Textbook of Female Urology and Urogynecology Two-Volume Set

VOLUME ONE: CLINICAL PERSPECTIVES

SECTION 1: BACKGROUND ISSUES
1. History of Urogynecology and Female Urology
2. Tackling the stigma of incontinence
3. The epidemiology of Urinary Incontinence, other lower urinary tract symptoms, and Pelvic Organ Prolapse
4 Natural history and prevention of Urinary Incontinence and urogenital prolapse
5 A short history of surgery for Stress Urinary Incontinence
6 The history of surgery for Pelvic Organ Prolapse
7 Medical error and patient safety in surgery
8 Medicolegal issues in Urogynaecology

SECTION 2: ROLE OF PATIENT REPORTED OUTCOME MEASURES AND HEALTH ECONOMICS
9 Patient-Reported Outcomes: From development to utilization
10 Patient-Reported Outcome questionnaires to assess health-related Quality of Life and symptom impact
11 Patient-Reported Outcome questionnaires to screen and measure satisfaction, expectations, and goal achievement
12 Questionnaires to assess sexual function
13 Questionnaires to assess bowel function
14 International Consultation on Incontinence Modular Questionnaire
15 Electronic Personal Assessment Questionnaire (ePAQ) pelvic floor
16 Questionnaires to assess Pelvic Organ Prolapse
17 Economic aspects of Urinary Incontinence

SECTION 3: STRUCTURE AND FUNCTION OF THE LOWER URINARY TRACT AND ANORECTAL TRACT IN WOMEN
18 Anatomy
19 Embryology of the female urogenital system and clinical applications
20 Tissue engineering and regenerative medicine for the female genitourinary system
21 Physiology of micturition
22 Pharmacology of the bladder and emerging treatments
23 Classification of Lower Urinary Tract Dysfunction in the female patient
24 Research horizons: Translational and in development

SECTION 4: DIAGNOSTIC EVALUATION OF INCONTINENCE AND UROGENITAL PROLAPSE Section Editor: Dudley Robinson
25 History and examination
26 Bladder diary and symptom scores
27 Pad tests
28 Basic urodynamic tests: Uroflowmetry
29 Basic urodynamic tests: Filling and voiding cystometry
30 Tests of urethral function

31 Videourodynamics
32 Special urodynamic tests: Ambulatory urodynamics
33 Basic neurological evaluation and referral
34 Imaging of the upper and lower urinary tract: Radiology
35 Ultrasound in urogynecology: Lower genitourinary tract
36 Magnetic Resonance Imaging in urogynecology
37 Cystoscopy and vesicoscopy
38 Urinalysis and urine culture
39 The urinary microbiome

SECTION 5: CONSERVATIVE AND MINIMALLY INVASIVE THERAPIES
40 The role of the Continence Nurse
41 Behavioral therapies and management of Urinary Incontinence in women
42 Physiotherapy for urinary incontinence
43 Pessaries and devices: Nonsurgical treatment of Pelvic Organ Prolapse and Stress Urinary Incontinence
44 Catheters, pads, and pants
45 Drug treatment of Lower Urinary Tract Dysfunction in women
46 Botulinum Toxin treatment of Neurogenic Detrusor Overactivity and Overactive Bladder
47 Electrical stimulation and magnetic stimulation
48 Peripheral neuromodulation
49 Sacral neuromodulation in the treatment of female Overactive Bladder syndrome and nonobstructive urinary retention
50 Nonsurgical transurethral radio frequency therapy, laser, and other interventions for the treatment of Stress Urinary Incontinence
51 Injectable bulking agents in the treatment of female Stress Urinary Incontinence

SECTION 6: ASSOCIATED DISORDERS
52 The Overactive Bladder
53 Neurological disorders
54 Nonneurogenic voiding dysfunction and urinary retention
55 Pathophysiology of chronic pelvic pain
56 Bladder Pain Syndrome/Interstitial Cystitis
57 The urinary and vaginal microbiomes
58 Bacterial cystitis in Urogynaecology: An update
59 Vaginitis
60 The impact of pregnancy and childbirth on the pelvic floor
61 Problems associated with sexual activity
62 Menopause
63 Sports and fitness activities
64 Anal incontinence
65 Constipation
66 Female Sexual Dysfunction

67 Multidisciplinary clinics: Urogynaecology, Colorectal, and Urology

VOLUME TWO: SURGICAL PERSPECTIVES

SECTION 7: SURGERY FOR URINARY INCONTINENCE
68 How and why incontinence surgery works
69 Peri- and postoperative care
70 Traditional surgery and other historical procedures for Stress Incontinence
71 Retropubic urethropexy
72 Fascial slings
73 Retropubic mid urethral sling procedure for the treatment of Female Urinary Stress Incontinence
74 Transobturator tape for surgical treatment of Stress Urinary Incontinence: Outside-in technique
75 Single-incision minislings
76 Readjustable slings: Safyre and Remeex
77 Artificial urinary sphincter for treatment of Stress Urinary Incontinence in women
78 Diagnosis and treatment of obstruction following incontinence surgery: Urethrolysis and other techniques
79 Complications of stress urinary incontinence surgery
80 Mesh complications and their management

SECTION 8: SURGERY FOR UROGENITAL PROLAPSE
81 Classification and epidemiology of Pelvic Organ Prolapse
82 Anterior vaginal wall prolapse
83 Enterocele
84 Rectocele: Anatomic and functional repair
85 Vaginal approach to apical suspension
86 Open abdominal approach to supporting the vaginal apex
87 Uterine preservation and hysteropexy
88 Surgery for urogenital prolapse: Colpocleisis
89 Biologic and synthetic grafts in reconstructive pelvic surgery
90 Complications of synthetic mesh used to repair Pelvic Organ Prolapse and Stress Urinary Incontinence
91 Management of the perineum, episiotomy, and perineal reconstruction
92 Primary repair of obstetric anal sphincter injuries
93 Surgery for fecal incontinence
94 Rectal prolapse and other causes of defecatory dysfunction

SECTION 9: LAPAROSCOPY AND ROBOTICS
95 Introduction: The role of laparoscopic surgery in Urogynecology
96 Abdominal and pelvic anatomy through the laparoscope
97 Training and accreditation in laparoscopic and robotic pelvic floor surgery
98 Laparoscopic colposuspension
99 Laparoscopic sacrocolpopexy
100 Laparoscopic sacrohysteropexy

101 Prevention, recognition, and treatment of complications in laparoscopic pelvic floor surgery
102 The role of robotic surgery
103 Cost-effectiveness in laparoscopic and robotic surgery in Urogynecology
104 New techniques in laparoscopic pelvic floor surgery

SECTION 10: COMPLEX PROBLEMS
105 Diagnosis of urogenital fistula
106 Transvaginal repair of vesicovaginal fistula
107 Transabdominal vesicovaginal and vesicouterine fistula repair
108 Management of obstetric urogenital fistula
109 Management of iatrogenic ureteral injury and ureterovaginal fistula
110 Management of urethrovaginal fistula
111 Urethral diverticulum
112 Diagnosis and management of female urethral stricture disease
113 Bladder reconstruction and urinary diversion
114 Gynaecological developmental abnormalities
115 Pediatric Urogynecology
116 Female cosmetic genital surgery
117 Gender-affirming surgery, care, and common complications

APPENDIX: Standardised terminology for incontinence and pelvic floor dysfunction
