

Peso	1 kg
Dimensiones	22 × 28 × 2 cm
Encuadernación	Tapa dura
Páginas	384
Año	2023
Edición	1era edición
Autor	Christian Phillips, Stephen Jeffery
Editorial	Cambridge University Press
ISBN	9781009123174
Idioma	Inglés

DESCRIPCIÓN DEL PRODUCTO

Laparoscopic surgery for the treatment of disorders such as urinary incontinence and pelvic organ prolapse is evolving rapidly with few resources available for clinicians. This text will act as a gold standard reference in the field of laparoscopic urogynaecological surgery. The introductory section covers the basics of laparoscopy, including patient selection, surgical set up and the prevention and management of complications. Further sections focus on different "gold standard" techniques and the procedural steps needed to perform the surgery, including chapters on colposuspension, paravaginal repair, laparoscopic hysterectomy as well as apical suspensory surgery such as sacrocolpopexy and sacrohysteropexy. The final section includes debates and opinion pieces on newer techniques as well as discussion on the use of mesh in treating pelvic organ prolapse. There is also a section addressing the current rise in robotic surgery. The editors and contributors are all experts in the field, providing an authoritative and global view on techniques. Highly illustrated, with videos demonstrating the techniques, this is an eminently practical guide to the use of laparoscopy in urogynaecology.

Puntos clave del libro Laparoscopic Urogynaecology 1st edition

- The text is structured clearly, with an introductory section on the basics of the technique and strategies for improving competence, followed by chapters with a focus on the practicalities of performing a wide range of

procedures
- Videos of the techniques are available on the webpage for the book, reinforcing the practical techniques explained in the book and aiding in teaching the methods used
- A readable and well-illustrated reference for clinicians and scientists, the book is fully updated with the latest research leaving readers confident they are following the most recent guidelines for treatment

Índice del libro Laparoscopic Urogynaecology 1st edition

Section 1. The Basics of Urogynecology:
1. Patient selection and assessment for laparoscopic urogynecology
2. Patient counseling and the consent process for laparoscopic urogynecology
3. Measuring outcomes in urogynecologic surgery
4. Surgical set-up, ergonomics, entry techniques, port placement and instrumentation for laparoscopic urogynecology
5. Surgical dissection and mesh attachment techniques for laparoscopic sacrocolpopexy
6. Surgical anatomy for laparoscopic urogynecology
7. Learning curve in laparoscopic urogynecologic surgery: strategies to optimize training and acquiring competence
8. Prevention and management of the complications of laparoscopic urogynecologic surgery
9. Mesh: types and indications for use for laparoscopic urogynecology
10. Medicolegal issues in laparoscopic urogynecology

Section 2. Procedureal Steps and Evidence:
11. Total and subtotal laparoscopic hysterectomy at sacrocolpopexy: procedure steps and evidence
12. Laparoscopic sacrohysteropexy: Oxford technique: procedure steps and evidence
13. Laparoscopic hysteropexy: procedure steps and evidence
14. Laparoscopic sacrocolpopexy: procedure steps and evidence
15. Laparoscopic native tissue repair: procedure steps and evidence
16. Laparoscopic pectopexy: procedure steps and evidence
17. Laparoscopic colposuspension: procedure steps and evidence
18. Laparoscopic paravaginal repair: procedure steps and evidence
19. Choice of sacrocolpopexy route including vaginal mesh attachment
20. Total laparoscopic hysterectomy: procedure steps and evidence
21. Vaginal hysterectomy and ligamentopexy for apical prolapse

22. Laparoscopic ventral rectopexy for rectal prolapse: steps and evidence

Section 3. Opinion and Debate:
23. Hysterectomy versus uterine preservation in the management of uterine prolapse
24. Laparoscopic hysterectomy: total or subtotal debate
25. Evidence-based approach to concomitant incontinence surgery at the time of sacrocolpopexy
26. Management of the posterior compartment in laparoscopic urogynecology: role of rectopexy, vaginal rectocele repair and perineorhaphy
27. The role of meshes in the treatment of female pelvic organ prolapse

Section 4. Robotic Surgery:
28. The rise of robotic surgery in benign gynecology
29. Unique advantages of robotics in urogynecology
30. Troubleshooting for robotic laparoscopic surgery: tips and tricks
