

Peso	1.1 kg
Dimensiones	18 × 26 × 2 cm
Encuadernación	Tapa dura
Páginas	324
Año	2023
Edición	1era edición
Autor	Cécile Tissot, María Victoria Fraga, Thomas Conlon, Yogen Singh
Editorial	Springer
ISBN	9783031265372
Idioma	Inglés

DESCRIPCIÓN DEL PRODUCTO

This book, written by internationally renowned experts, is a comprehensive text covering all aspects and recommendations regarding the use of POCUS for critically ill neonates and children. *Point of Care Ultrasound (POCUS) for the Neonatal and Pediatric Intensivist* is structured to address and expand upon recently published international evidence-based POCUS guidelines endorsed by the European Society of Paediatric and Neonatal Intensive Care (ESPNIC).

The book is richly illustrated and includes a robust collection of individual POCUS images and cases. The Electronic Supplementary Materials offer high-quality and interesting video clips complementing reader learning, particularly for neonatology, pediatric critical care, and general pediatric providers.

Chapter authors provide a practical, experience-based approach to clinical integration of POCUS applications and highlight relevant supportive literature as well as important limitations to POCUS use in the management of critically ill children. The information within the book is also intended to support further clinical and educational research in the practice of pediatric POCUS.

Índice del libro Point-of-Care Ultrasound for the Neonatal and Pediatric Intensivist 1st edition

Part I. Basics in Critical Care and Neonatal Point of Care Ultrasound

1 Introduction to Point of Care Ultrasound

2 Physics, Knobology, and Transducers: Imaging Optimization

Part II. Cardiovascular System Assessment

3 Basic Echocardiographic Views for the Intensivist

4 POCUS in Shock and Hypotension

5 Echocardiographic Evaluation of Left Ventricular Function and Hemodynamic Status

6 Focused Ultrasound in Right Ventricular Function and Pulmonary Hypertension

7 Focused Assessment of Pericardial Effusion and Cardiac Tamponade

8 Advanced Functional Echocardiographic Views Including PDA Assessment and Hemodynamic Evaluation

9 Comprehensive Echocardiography and Diagnosis of Major Common Congenital Heart Defects

Part III. Thoracic Assessment

10 Basic Lung Ultrasound for the Intensivist

11 Airway Ultrasound

12 Diaphragmatic Ultrasound

13 Clinical Applications in Lung Point-of-Care Ultrasound Assessment in Neonates

Part IV. Abdominal Assessment

14 Abdominal Point-of-Care Ultrasound in Neonatal and Pediatric Populations

Part V. Neurosonology

15 Focused Cranial Ultrasound for Neurointensive Care

16 Cranial Ultrasound

Part VI. Use of Point of Care Ultrasound in Transport Setting

17 Role of Point of Care Ultrasound in the Transport Setting for Evaluating Infants and Children with Shock

Part VII. Procedural Ultrasound

18 Vascular Access Considerations in Children and Neonates

19 Ultrasound-Guided Procedures Beyond Vascular Access

20 Use of Ultrasound in ECMO

Part VIII. Programmatic Considerations and Moving Forward

21 POCUS Guidelines, Training Curriculum, and Education

22 Current and Future Challenges to Ultrasound Adoption in Clinical Practice

23 Correction to: Echocardiographic Evaluation of Left Ventricular Function and Hemodynamic Status

Appendix: Learning Outcomes
