

Peso	3.4 kg
Dimensiones	23 × 28 × 5 cm
Encuadernación	Tapa dura
Páginas	1272
Año	2016
Edición	8a edición
Autor	Christopher B. Wilson, Jack S. Remington, Jerome O. Klein
Editorial	Elsevier
ISBN	9780323241472

DESCRIPCIÓN DEL PRODUCTO

Infectious Diseases of the Fetus and Newborn Infant, written and edited by Drs. Remington, Klein, Wilson, Nizet, and Maldonado, remains the definitive source of information in this field. The 8th edition of this authoritative reference provides the most up-to-date and complete guidance on infections found in utero, during delivery, and in the neonatal period in both premature and term infants. Special attention is given to the prevention and treatment of these diseases found in developing countries as well as the latest findings about new antimicrobial agents, gram-negative infections and their management, and recommendations for immunization of the fetus/mother. Nationally and internationally recognized in immunology and infectious diseases, new associate editors Nizet and Maldonado bring new insight and fresh perspective to the book.

New to this edition

- Explore what's changing in key areas such as:
 - emerging problems and concepts in maternal, fetal, and neonatal infectious diseases
 - anticipation and recognition of infections occurring in utero, during delivery, and in the neonatal period
- Stay on the cutting edge of your field with new and improved chapters including: obstetric factors associated with infections of the fetus and newborn infant; human milk; borella infections; tuberculosis; bordetella

pertussis and other bordetella sp infections; herpes simplex; toxoplasmosis; pneumocystis and other less common fungal infections; and healthcare-associated infections in the nursery

- Keep up with the most relevant topics in fetal/neonatal infectious disease including new antimicrobial agents, gram-negative infections and their management, and recommendations for immunization of the fetus/mother.
- Overcome clinical challenges in developing countries where access to proper medical care is limited.
- Expert Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, references, and videos from the book on a variety of devices.

Key Features

- Form a definitive diagnosis and create the best treatment plans possible using evidence-based recommendations and expert guidance from world authorities.
- Locate key content easily and identify clinical conditions quickly thanks to a consistent, highly user-friendly format now featuring a full-color design with hundreds of illustrations, and fresh perspectives from six new authoritative chapter lead authors.

Índice de Remington and Klein's Infectious Diseases of the Fetus and Newborn Infant 8th Edition

Section I: General Information

1. Current Concepts of Infections of the Fetus and Newborn Infant
2. Neonatal Infections: A Global Perspective
3. Obstetric Factors Associated with Infections of the Fetus and Newborn Infant
4. Developmental Immunology and Role of Host Defenses in Fetal and Neonatal Susceptibility to Infection
5. Human Milk

Section II: Bacterial Infections

6. Bacterial Sepsis and Meningitis
7. Bacterial Infections of the Respiratory Tract
8. Bacterial Infections of the Bones and Joints
9. Bacterial Infections of the Urinary Tract
10. Focal Bacterial Infections
11. Microorganisms Responsible for Neonatal Diarrhea
12. Group B Streptococcal Infections
13. Listeriosis
14. Staphylococcal Infections
15. Gonococcal Infections
16. Syphilis
17. Borella Infections: Lyme Disease and Relapsing Fever
18. Tuberculosis
19. Chlamydia Infections
20. Mycoplasmal Infections
21. Bordetella pertussis and Other Bordetella spp. Infections

Section III: Viral Infections

22. Human Immunodeficiency Virus/Acquired Immunodeficiency Syndrome in the Infant
23. Varicella, Measles, and Mumps
24. Cytomegalovirus
25. Enterovirus and Parechovirus Infections
26. Hepatitis
27. Herpes Simplex Virus Infections
28. Human Parvovirus
29. Rubella
30. Less Common Viral Infections

Section IV: Protozoan, Helminth, and Fungal Infections

31. Toxoplasmosis
32. Malaria and Less Common Protozoan and Helminth Infections
33. Candidiasis
34. Pneumocystis and Other Less Common Fungal Infections

Section V: Diagnosis and Management

35. Healthcare-Associated Infections in the Nursery
36. Laboratory Aids for Diagnosis of Neonatal Sepsis
37. Clinical Pharmacology of Antiinfective Drugs
38. Prevention of Fetal and Early Life Infections Through Maternal-Neonatal Immunization
