## DESCRIPCIÓN DEL PRODUCTO

Featuring contributions by an international team of the world's experts in urology and gynecology, this fifth edition reinforces its status as the classic comprehensive resource on female urology and urogynecology and an essential clinical reference in the field. There are new chapters throughout and new commentaries on important documents in the appendixes; each volume is now available separately. \*Offers a comprehensive guide to both medical and surgical sides \*Covers important and common topics such as stress incontinence, pelvic organ prolapse, and robotic surgery and newer topics such as transgender surgery \*Presents a practical and manageable level of detail

## Índice del libro Textbook of Female Urology and Urogynecology Two-Volume Set

### VOLUME ONE: CLINICAL PERSPECTIVES

#### SECTION 1: BACKGROUND ISSUES

1. History of Urogynecology and Female Urology
2. Tackling the stigma of incontinence
3. The epidemiology of Urinary Incontinence, other lower urinary tract symptoms, and Pelvic Organ Prolapse
- 4 Natural history and prevention of Urinary Incontinence and urogenital prolapse
- 5 A short history of surgery for Stress Urinary Incontinence
- 6 The history of surgery for Pelvic Organ Prolapse
- 7 Medical error and patient safety in surgery
- 8 Medicolegal issues in Urogynaecology

#### SECTION 2: ROLE OF PATIENT REPORTED OUTCOME MEASURES AND HEALTH ECONOMICS

- 9 Patient-Reported Outcomes: From development to utilization
- 10 Patient-Reported Outcome questionnaires to assess health-related Quality of Life and symptom impact
- 11 Patient-Reported Outcome questionnaires to screen and measure satisfaction, expectations, and goal achievement
- 12 Questionnaires to assess sexual function
- 13 Questionnaires to assess bowel function
- 14 International Consultation on Incontinence Modular Questionnaire
- 15 Electronic Personal Assessment Questionnaire (ePAQ) pelvic floor
- 16 Questionnaires to assess Pelvic Organ Prolapse
- 17 Economic aspects of Urinary Incontinence

#### SECTION 3: STRUCTURE AND FUNCTION OF THE LOWER URINARY TRACT AND ANORECTAL TRACT IN WOMEN

- 18 Anatomy
- 19 Embryology of the female urogenital system and clinical applications
- 20 Tissue engineering and regenerative medicine for the female genitourinary system
- 21 Physiology of micturition
- 22 Pharmacology of the bladder and emerging treatments
- 23 Classification of Lower Urinary Tract Dysfunction in the female patient
- 24 Research horizons: Translational and in development

#### SECTION 4: DIAGNOSTIC EVALUATION OF INCONTINENCE AND UROGENITAL PROLAPSE Section Editor: Dudley Robinson

- 25 History and examination
- 26 Bladder diary and symptom scores
- 27 Pad tests
- 28 Basic urodynamic tests: Uroflowmetry
- 29 Basic urodynamic tests: Filling and voiding cystometry
- 30 Tests of urethral function

- 31 Videourodynamics
- 32 Special urodynamic tests: Ambulatory urodynamics
- 33 Basic neurological evaluation and referral
- 34 Imaging of the upper and lower urinary tract: Radiology
- 35 Ultrasound in urogynecology: Lower genitourinary tract
- 36 Magnetic Resonance Imaging in urogynecology
- 37 Cystoscopy and vesicoscopy
- 38 Urinalysis and urine culture
- 39 The urinary microbiome

#### SECTION 5: CONSERVATIVE AND MINIMALLY INVASIVE THERAPIES

- 40 The role of the Continence Nurse
- 41 Behavioral therapies and management of Urinary Incontinence in women
- 42 Physiotherapy for urinary incontinence
- 43 Pessaries and devices: Nonsurgical treatment of Pelvic Organ Prolapse and Stress Urinary Incontinence
- 44 Catheters, pads, and pants
- 45 Drug treatment of Lower Urinary Tract Dysfunction in women
- 46 Botulinum Toxin treatment of Neurogenic Detrusor Overactivity and Overactive Bladder
- 47 Electrical stimulation and magnetic stimulation
- 48 Peripheral neuromodulation
- 49 Sacral neuromodulation in the treatment of female Overactive Bladder syndrome and nonobstructive urinary retention
- 50 Nonsurgical transurethral radio frequency therapy, laser, and other interventions for the treatment of Stress Urinary Incontinence
- 51 Injectable bulking agents in the treatment of female Stress Urinary Incontinence

#### SECTION 6: ASSOCIATED DISORDERS

- 52 The Overactive Bladder
- 53 Neurological disorders
- 54 Nonneurogenic voiding dysfunction and urinary retention
- 55 Pathophysiology of chronic pelvic pain
- 56 Bladder Pain Syndrome/Interstitial Cystitis
- 57 The urinary and vaginal microbiomes
- 58 Bacterial cystitis in Urogynaecology: An update
- 59 Vaginitis
- 60 The impact of pregnancy and childbirth on the pelvic floor
- 61 Problems associated with sexual activity
- 62 Menopause
- 63 Sports and fitness activities
- 64 Anal incontinence
- 65 Constipation
- 66 Female Sexual Dysfunction

67 Multidisciplinary clinics: Urogynaecology, Colorectal, and Urology

## **VOLUME TWO: SURGICAL PERSPECTIVES**

### **SECTION 7: SURGERY FOR URINARY INCONTINENCE**

68 How and why incontinence surgery works

69 Peri- and postoperative care

70 Traditional surgery and other historical procedures for Stress Incontinence

71 Retropubic urethropexy

72 Fascial slings

73 Retropubic mid urethral sling procedure for the treatment of Female Urinary Stress Incontinence

74 Transobturator tape for surgical treatment of Stress Urinary Incontinence: Outside-in technique

75 Single-incision minislings

76 Readjustable slings: Safyre and Remeex

77 Artificial urinary sphincter for treatment of Stress Urinary Incontinence in women

78 Diagnosis and treatment of obstruction following incontinence surgery: Urethrolysis and other techniques

79 Complications of stress urinary incontinence surgery

80 Mesh complications and their management

### **SECTION 8: SURGERY FOR UROGENITAL PROLAPSE**

81 Classification and epidemiology of Pelvic Organ Prolapse

82 Anterior vaginal wall prolapse

83 Enterocele

84 Rectocele: Anatomic and functional repair

85 Vaginal approach to apical suspension

86 Open abdominal approach to supporting the vaginal apex

87 Uterine preservation and hysteropexy

88 Surgery for urogenital prolapse: Colpocleisis

89 Biologic and synthetic grafts in reconstructive pelvic surgery

90 Complications of synthetic mesh used to repair Pelvic Organ Prolapse and Stress Urinary Incontinence

91 Management of the perineum, episiotomy, and perineal reconstruction

92 Primary repair of obstetric anal sphincter injuries

93 Surgery for fecal incontinence

94 Rectal prolapse and other causes of defecatory dysfunction

### **SECTION 9: LAPAROSCOPY AND ROBOTICS**

95 Introduction: The role of laparoscopic surgery in Urogynecology

96 Abdominal and pelvic anatomy through the laparoscope

97 Training and accreditation in laparoscopic and robotic pelvic floor surgery

98 Laparoscopic colposuspension

99 Laparoscopic sacrocolpopexy

100 Laparoscopic sacrohysteropexy

- 101 Prevention, recognition, and treatment of complications in laparoscopic pelvic floor surgery
- 102 The role of robotic surgery
- 103 Cost-effectiveness in laparoscopic and robotic surgery in Urogynecology
- 104 New techniques in laparoscopic pelvic floor surgery

#### SECTION 10: COMPLEX PROBLEMS

- 105 Diagnosis of urogenital fistula
- 106 Transvaginal repair of vesicovaginal fistula
- 107 Transabdominal vesicovaginal and vesicouterine fistula repair
- 108 Management of obstetric urogenital fistula
- 109 Management of iatrogenic ureteral injury and ureterovaginal fistula
- 110 Management of urethrovaginal fistula
- 111 Urethral diverticulum
- 112 Diagnosis and management of female urethral stricture disease
- 113 Bladder reconstruction and urinary diversion
- 114 Gynaecological developmental abnormalities
- 115 Pediatric Urogynecology
- 116 Female cosmetic genital surgery
- 117 Gender-affirming surgery, care, and common complications

APPENDIX: Standardised terminology for incontinence and pelvic floor dysfunction
