

Peso	3.1 kg
Dimensiones	22 × 28 × 6 cm
Encuadernación	Tapa dura
Páginas	1168
Año	2025
Edición	4a edición
Autor	Karen G. Ordovas, Travis S. Henry
Editorial	Wolters Kluwer
ISBN	9781975199388
Idioma	Inglés

DESCRIPCIÓN DEL PRODUCTO

A must-have reference through three outstanding editions, Webb & Higgins Thoracic Imaging, 4th Edition, is your one-stop source for current, accurate coverage of optimal imaging of the heart and lungs. Drs. Travis S. Henry and Karen G. Ordovas continue the tradition of excellence, providing practical, authoritative guidance for the radiologic assessment and diagnosis of both congenital and acquired cardiovascular and pulmonary disease. Updated content, new guidelines and classifications, and new online features ensure that this leading text-reference remains your #1 choice for staying current in this complex field.

Puntos clave del libro Webb & Higgins Thoracic Imaging 4th edition

- Offers readable, comprehensive coverage of pulmonary infections, diffuse lung diseases, mediastinal masses, coronary artery CT, myocardial disease, pericardial disease, CT of ischemic heart disease, and much more.
- Shares the experience and knowledge of two new lead editors—Travis S. Henry (pulmonary imaging) and Karen G. Ordovas (cardiac imaging)—both hand-picked by founding authors, W. Richard Webb and Charles Higgins
- Features more than 2,700 high-quality images, many in full color, that demonstrate important imaging findings and the typical appearance of disease entities
- Contains hundreds of quick-reference tables with the most important information from key studies and findings

- Reflects the latest WHO classifications and guidelines, and highlights the recent impact of AI on thoracic imaging

Enrich your eBook reading experience

- Read directly on your preferred device(s), such as computer, tablet, or smartphone.
- Easily convert to audiobook, powering your content with natural language text-to-speech.

Índice del libro Webb & Higgins Thoracic Imaging 4th edition

Section One: The Basics

1. Lobar anatomy, air-space consolidation, the silhouette sign, and atelectasis
2. The normal mediastinum
3. The pulmonary hila
4. Thoracic MRI

Section Two: Neoplasms, Masses, and Focal Lung Abnormalities

5. Lung cancer and bronchopulmonary neoplasms
6. Metastatic tumor
7. Lymphoma and lymphoproliferative disease
8. The mediastinum: mediastinal masses
9. Congenital lung abnormalities and pulmonary vascular malformations
10. Solitary and multiple nodules, masses, cavities, and cysts

Section Three: Diffuse and Multifocal Lung Diseases

11. Plain film and computed tomographic assessment of diffuse lung disease
12. Pulmonary edema, the acute respiratory distress syndrome, and radiology in the intensive care unit
13. Pulmonary infections
14. The idiopathic interstitial pneumonias
15. Connective tissue diseases
16. Sarcoidosis and occupational lung diseases
17. Allergic lung diseases: hypersensitivity pneumonitis and eosinophilic lung disease
18. Iatrogenic lung diseases: drug-induced lung disease and radiation pneumonitis
19. Pulmonary vasculitis and diffuse alveolar hemorrhage
20. Diffuse lung disease associated with lipid: exogenous lipid pneumonia and alveolar proteinosis
21. Diffuse lung diseases associated with calcification

Section Four: Airway Abnormalities

- 22. The trachea
- 23. Airway disease: bronchiectasis, chronic bronchitis, and bronchiolitis

Section Five: COPD, Emphysema, and Cystic Lung Diseases

- 24. Chronic obstructive pulmonary disease and emphysema
- 25. Diffuse cystic lung diseases

Section Six: Pleural Abnormalities

- 26. The pleura and pleural disease
- 27. The diaphragm

Section Seven: Great Arteries

- 28. Pulmonary thromboembolic disease
- 29. Pulmonary hypertension
- 30. CT and MRI of the thoracic aorta

Section Eight: Radiography of Heart Disease

- 31. Radiography of acquired heart disease
- 32. Radiography of congenital heart disease

Section Nine: Acquired Nonischemic Heart Disease

- 33. Valvular heart disease
- 34. Myocardial diseases
- 35. Pericardial diseases
- 36. Cardiac and paracardiac masses

Section Ten: Congenital Heart Disease

- 37. Computed tomography angiography of congenital heart disease
- 38. Magnetic resonance imaging of congenital heart disease

Section Eleven: Ischemic Heart Disease

- 39. Magnetic resonance imaging of ischemic heart disease
- 40. Computed tomography of coronary arteries and ischemic heart disease

Section Twelve: Cardiac Arrhythmias

- 41. Cardiac magnetic resonance for guidance of electrophysiology procedures
- 42. CTA for guidance of structural heart disease procedures
